

INTERNOVA

WOODEN TAILOR MADE FURNITURE

Founded in 1991, Internova has been refining its sophisticated manufacturing expertise in wooden tailor made furniture. Since then it has been developing enterprenurial competences with which stands out among others in this field, and has become a leader of bespoke Croatian furniture.

Our guide values are: craftsmanship, technology development, commitment, excellence and passion. In our production, hand-made crafts are complemented by cutting-edge technology in strong bond with the territory and local traditions.

Highly-skilled technical department ensures that all individual services (in-house and outsourced) are coordinated in professional maner to create a desired result. Our excellence is guaranteed by a strong network of highly qualified specialists and external partners for material such as steel, stone, lightning, glass, which allow designers to create spaces that are unique every time through customization of shapes, sizes and materials.

For us, manufacturing is more than just putting parts together. It's coming up with ideas, testing solutions, and perfecting the engineering, as well as final assembly. The company is a pioneer in its field thanks to its striking inclination for constant research and innovation, working with and for important and ambitious architects and designers, who challenged us to try new things, gave us power to think differently and the oportunity to interpret their forms and offer them freedom in design and functionality, to the benefit of every customer.

These are the characteristics that distinguish the Internova brand today. We have been doing so for the past 25 years and will continue doing it so in the future!
